PROFESSIONAL PROFILE

Software Development Technologist with hands-on experience in on-site technical support, management, automation, and control of enterprise databases, equipment formatting, printer maintenance, and technology inventory. Experienced in supporting SaaS platforms, incident documentation, and collaboration with multidisciplinary teams. Proficient with tools such as Excel, HelpDesk, and management systems, with the technical ability to understand problems at their root and resolve them with precision. Clear communication with users of any profile, focused on data quality and continuous process improvement.

TECHNICAL SKILLS

🖨 Support & Hardware

- ✓ OS installation and formatting (Windows)
- ✓ Printer maintenance
- ✓ IT asset inventory and control
- ✓ Incident diagnosis and escalation
- ✓ SaaS platform support (Buk, DocuSign)
- ✓ HelpDesk (ticketing) systems

📊 Data & Tools

- ✓ Database management and control
- ✓ IA Developer
- ✓ Data validation and quality
- ✓ SQL · MySQL · MariaDB
- ✓ Git · GitHub · REST APIs
- ✓ Microsoft Office 365

PROFESSIONAL EXPERIENCE

IT & Automation · JYC Equipment

May 2026 – Present

- ▶ **Data management and quality:** administration, cleansing, validation, and updating of large volumes of enterprise information, ensuring its structure, consistency, and availability for the organization's various processes.
- ▶ **Automation and artificial intelligence:** development and implementation of AI-supported solutions to optimize internal processes, including a training agent for the sales team focused on practicing and evaluating conversations in English.
- ▶ **API integration:** connecting and integrating platforms through APIs, including Close CRM, Instantly, and Constant Contact, enabling automated information exchange between systems and optimizing sales processes.
- ▶ **Communication campaigns:** configuration, management, and tracking of email campaigns through Instantly, working with segmented databases and outbound prospecting processes.
- ▶ **Web development:** creation and maintenance of websites and internal tools tailored to the company's needs, applying web development technologies and customized digital solutions.
- ▶ **Process automation:** identifying repetitive tasks and developing digital solutions to reduce manual processes, improve operational efficiency, and facilitate information management.
- ▶ **Analysis and reporting:** processing and analyzing information using Excel and digital tools, generating reports that support process tracking and decision-making.
- ▶ **Technology support:** assisting with the implementation, configuration, and use of digital tools, supporting different areas, and contributing to the optimization of internal processes.
- ▶ **Cross-departmental collaboration:** working together with sales and administrative teams to identify needs, propose technological solutions, and improve information flow within the organization.

Freelance IT Technician · RYS Soluciones

Jan 2026 – Present

- ▶ **Inventory organization:** surveying, classifying, and controlling inventory of equipment and technology components, ensuring asset traceability and availability.

- ▶ **Equipment formatting and configuration:** installation and reinstallation of operating systems (Windows), software configuration, drivers, and productivity tools on desktops and laptops.
- ▶ **Printer technical review:** diagnosis, cleaning, and preventive and corrective maintenance of printers, identifying mechanical and software faults for timely resolution.
- ▶ **Technical customer service:** assisting users with varying levels of technical knowledge, explaining solutions clearly and ensuring satisfaction with the service.

Support & Digital Transformation Trainee (SENA) · Lean Solutions Group

Feb 2025 – Aug 2025

- ▶ **Incident management:** diagnosed and documented complex incidents on SaaS platforms (Buk and DocuSign), including failures in data export flows and banking files, ensuring resolution and traceability.
- ▶ **Internal help desk:** handled requests from internal users, prioritized cases, and coordinated with the technical team for timely escalation and ticket closure.
- ▶ **Technical documentation:** wrote incident manuals, support procedures, and tracking reports that improved the IT team's efficiency.
- ▶ **Analysis and continuous improvement:** identified patterns in reported issues and proposed process improvements to reduce incident recurrence.

Customer Service & Operations Management · Restaurante El Naranjal

2021 – 2025

- ▶ **Real-time problem solving:** handled and resolved critical situations under pressure while maintaining service quality — a skill directly transferable to technical support.
- ▶ **Systems handling:** used digital order management and reporting tools, with ongoing tracking of operational processes.
- ▶ **User communication:** developed active listening skills and effective communication with people of different backgrounds — key for level 1 support.

EDUCATION

Multimedia Engineering (Virtual) · Universidad UNAD

In progress

Software Development Technology · Universidad del Valle

2022 – 2026

Solid technical foundation in networking, databases, operating systems, and the software development lifecycle.

Academic High School Diploma · Institución Educativa La Salle

Completed

ADDITIONAL INFORMATION

Languages: Spanish (Native) · English B1 (technical documentation comprehension)

Certifications: SENA Trainee – Digital Transformation and IT Support (2025)

Technical Skills:

- Database management and analysis
- Excel and data processing
